PHISHING AWARENESS PROGRAM

*Learn to Identify, Prevent &
Report **Phishing Attacks***

Presented by:

Aman Tomar

CodSoft Cyber Security Internship

2. WHAT IS PHISHING?

DEFINITION

Phishing is a cyber attack where attackers pretend to be a trusted person or organization to steal sensitive information such as:

Passwords

Banking Details

Credit Card Numbers

OTPs

Personal Information

KEY FACT

90%+ cyber attacks begin with phishing emails.

**PHISHING
ALERT**

3. HOW PHISHING WORKS

Remember: Phishing attacks are designed to trick you. Always stay alert and think before you click!

TYPES OF PHISHING

EMAIL PHISHING

Fake emails pretending to be banks or companies.

SPEAR PHISHING

Targeted attack on a specific person.

WHALING

Attack on CEOs and executives.

SMISHING

Phishing using SMS messages.

VISHING

Voice call scams.

CLONE PHISHING

Copies a legitimate email with malicious links.

FAKE BANKING EMAIL

From: SBI Online <support@sbi-secure-alert.com>
To: Customer
Subject: **Urgent! Your SBI Account Will Be Blocked**

Dear Customer,

Your account has been temporarily suspended.

"Verify your account immediately."

Click the link below to reactivate your account.

Verify Now

If you do not verify, your account will be permanently blocked.

Thank you,
SBI Security Team

Fake Link:

www.sbi-verification-login.xyz

Real Website:

<https://onlinesbi.sbi>

RED FLAGS

Urgent language

Suspicious URL

Grammar mistakes

Your account has been **block**.

Requests passwords or OTP

Always think before you click!

Verify the sender and URL before taking any action.

HOW TO IDENTIFY PHISHING

Look carefully at:

 **LEGITIMATE / SAFE**

	From: support@sbi.co.in Official email address
	 https://onlinesbi.sbi Correct domain, HTTPS
ABC	Dear Customer, Your account is secure. Well written, no errors
	No unexpected attachments Safe email
	Friendly & Informative No threats or urgency
	Never asks for OTP or password Safe & trustworthy

	Sender Email Address
	Website URL
	Grammar Errors
	Unexpected Attachments
	Threatening Messages
	Requests for OTP or Password

 **PHISHING / SUSPICIOUS**

	From: support@sbi-alert.com Suspicious or different domain
	http://sbi-verification-login.xyz Wrong domain, No HTTPS
	Dear Costumer, Your account is block. Spelling & grammar mistakes
	Attachment like "Invoice.zip" or "Update.doc" Could contain malware
	"Your account will be blocked immediately!" Creates fear & urgency
	Asks for OTP, PIN or Password Never share these details

Golden Rule: If something looks **SUSPICIOUS**, don't click, don't reply, don't share.

**Stay Alert.
Stay Safe.**

How to Stay Safe from Phishing

✓ **Always verify** the sender's email address.

✓ **Keep your operating system and browser updated.**

✓ **Never click** suspicious links.

✓ **Use antivirus** software.

✓ **Type important** website URLs manually.

✓ **Never share** OTPs or passwords.

✓ **Enable Two-Factor Authentication (2FA).**

✓ **Report suspicious** emails to your IT team or email provider.

STAY SAFE, STAY SECURE

BE ALERT. BE AWARE. BE SAFE.
Think before you click!

What to Do If You Click a Phishing Link

Act quickly. The faster you respond, the more secure you are.

1 Clicked Link

2 Change Password

3 Scan Device

4 Report Incident

5 Secure Account

Disconnect from the internet (if malware is suspected).

Change your passwords immediately.

Scan your device with antivirus software.

Report the phishing email to your organization or email provider.

Contact your bank if financial information was shared.

Remember:

Cyber criminals rely on speed and panic. Stay calm and follow the right steps.

Test Your Knowledge

Choose the correct answer

1

Which is a sign of a phishing email?

- ☐ A Correct grammar
- ☒ B Requests for OTP or password
- ☐ C Official website URL
- ☐ D Verified sender

2

What should you check before clicking a link?

- ☐ A Email color
- ☒ B Website URL
- ☐ C Font size
- ☐ D Attachment size

3

Which security feature adds extra protection?

- ☐ A Incognito Mode
- ☒ B Two-Factor Authentication (2FA)
- ☐ C Dark Mode
- ☐ D Airplane Mode

Great job!

Stay alert, stay safe, and think before you click.

Key Takeaways

Simple steps. Strong protection.

Phishing is one of the most **common** cyber attacks.

Always **verify** emails and website URLs.

Never share **passwords** or **OTPs**.

Enable **Two-Factor Authentication**.

Stay alert against social engineering tactics.

Report suspicious emails immediately.

Be Aware. Be Secure.
Your vigilance is your best defense.

Cyber attackers rely on tricks.
You can stop them with **awareness** and **caution**.

Think Before You Click!

Thank You!

Stay Alert. Stay Safe. Stop Phishing.
